MERIDIAN ENERGY BELGIUM NV

Frankrijklei 112, 2000 Antwerpen, Belgium | VAT BE 0654.982.117 | EAN supplier code 5410000000021

ELECTRICITY SUPPLY AGREEMENT

Contract reference **MEB-2026-04417** · Product: Flex Industrial Supply + Structured Hedging

THE SUPPLIER	THE CUSTOMER
Meridian Energy Belgium NV Frankrijklei 112, 2000 Antwerpen VAT BE 0654.982.117 Represented by: L. Vermeulen, Head of B2B Sales	**Nordpoint Logistics NV** Havenlaan 88, 9000 Gent VAT BE 0731.446.902 Represented by: A. De Smet, Facility Director

Delivery point (EAN)	541448000000217345	**Connection**	High-voltage, Elia grid
Site	Gent Distribution Centre	**Metered by**	Fluvius (15-min AMR)
Contract start	1 January 2026, 00:00 CET	**Contract end**	31 December 2027, 24:00 CET
Signature date	18 November 2025	**Currency**	EUR (€)

This Electricity Supply Agreement (the “Agreement”) is entered into between the Supplier and the Customer on the signature date stated above. It governs the supply, purchase, hedging and grid-related costs of electrical energy at the delivery point identified above for the full contract term. The commercial and financial terms are set out in **Annex A (Pricing Schedule)**, which forms an integral part of this Agreement. In the event of conflict between the general conditions and Annex A, Annex A prevails for commercial matters.

All prices are stated exclusive of VAT unless otherwise indicated. Volumes are expressed in megawatt-hours (MWh) and capacities in kilowatts (kW). Times are Central European (CET/CEST). “Spot price” means the Belgian day-ahead hourly clearing price (BELPEX / EPEX SPOT BE), published one day before delivery.

ANNEX A — PRICING SCHEDULE

This annex specifies each priced component of the Customer's energy supply. Components apply to the delivery point EAN 541448000000217345 unless a different scope is stated.

A.1 Day-Ahead Spot Energy (variable)

Energy consumed from the grid and not covered by a hedge under clause A.2 or A.4 is invoiced at the day-ahead spot price, adjusted for the Supplier's balancing and profile costs. The unit energy cost per hour *h* is calculated as:

unit_cost(h) = spot_price(h) × 1.042 + 3.10 €/MWh

The scaling factor of 1.042 and the additive constant of €3.10/MWh represent the Supplier's markup on the wholesale index. This component applies to **consumption** (off-take from the grid) and is applicable **at all hours** of the contract term. Where hedged volume in any hour exceeds the Customer's actual consumption, the surplus hedged energy is sold back to the market at the prevailing spot price and credited to the Customer at spot_price(h) × 0.98.

A.2 Fixed-Price Hedge (peak block)

The Customer has elected to fix a baseload block to reduce exposure to spot volatility. The following fixed-price cover applies:

Parameter	Value
Hedged volume	**4.0 MW constant (fixed capacity block)**
Fixed price	**€81.50 / MWh**
Applies to	Consumption / Buy
Applicable period	Peak hours only — Monday to Friday, 08:00–20:00 CET. Does not apply on weekends or public holidays.
Settlement	cost = €81.50 × hedged_volume. Volume consumed above the hedged block, or in off-peak hours, falls under clause A.1.

The fixed-price hedge under this clause commences on **1 January 2026** and terminates early on **31 December 2026, 24:00** — i.e. it covers only the first contract year. For calendar year 2027 the Customer is, at the date of signature, unhedged on the peak block and will be invoiced under clause A.1 unless a further hedge is agreed by separate addendum.

A.3 Physical Power Purchase Agreement (solar)

The Supplier will deliver physical renewable energy from a dedicated solar installation (“Zonnepark Lochristi”, 12 MWp) under a physical PPA. Energy delivered under this clause is injected against the Customer's off-take and priced independently of the spot index:

Parameter	Value
Type	**Physical PPA (pay-as-produced)**
Producing asset	Zonnepark Lochristi — solar, 12 MWp
Contracted price	**€62.00 / MWh (flat, all delivered volume)**
Direction	Production / Buy (Customer buys the farm's output)
Delivery term	1 January 2026 – 31 December 2027 (full term)
Volume cap	Up to 13,000 MWh per calendar year

The PPA is **physical**: actual energy is delivered to the delivery point. Any produced volume exceeding the Customer's consumption in a given interval is settled at the spot price under clause A.1. This clause applies at all hours (the farm delivers whenever it produces).

A.4 Fixed Costs (grid access and metering)

The following recurring charges are independent of consumed volume and are billed as flat amounts for the duration of the contract:

Charge	Amount	Basis
Grid access & capacity fee	**€21,600 / year**	Fixed annual, billed monthly (€1,800/mo)
Metering & data services	**€145 / month**	Fixed, per delivery point

These fixed costs apply for the entire contract term (1 January 2026 – 31 December 2027) and are not tied to energy volume.

A.5 Energy Taxes and Levies

The following statutory charges are applied per unit of energy consumed and passed through to the Customer. Rates are set by the competent authorities and may be revised by law during the term; the rates below apply as at the signature date:

Levy	Rate	Applied to
Federal energy contribution	**€3.20 / MWh**	All consumed energy
Regional energy tax (accijnzen)	**€10.75 / MWh**	All consumed energy

The combined energy tax of **€13.95/MWh** is charged on total metered consumption at the delivery point, at all hours, for the full contract term.

A.6 Summary of Priced Components

Clause	Component	Price / rate	Period	Time window
A.1	Day-ahead spot	spot × 1.042 + 3.10	2026-01-01 → 2027-12-31	All hours
A.2	Fixed hedge	€81.50/MWh, 4 MW	2026-01-01 → 2026-12-31	Mon–Fri 08:00–20:00
A.3	Physical PPA (solar)	€62.00/MWh	2026-01-01 → 2027-12-31	All hours
A.4	Fixed costs	€21,600/yr + €145/mo	2026-01-01 → 2027-12-31	N/A (flat)
A.5	Energy tax	€13.95/MWh	2026-01-01 → 2027-12-31	All hours

SIGNATURES

By signing below, both parties confirm they have read, understood and agreed to this Agreement including Annex A. This Agreement is executed in two originals.
